For the third quarter, the average time for the Postal Service to deliver a mailpiece or package across the nation was just 2.5 days.

FY2022 third quarter service performance scores covering April 1 through June 30 included:

One of the goals of Delivering for America, the Postal Service's 10-year plan for achieving financial sustainability and service excellence, is to meet or exceed 95 percent on-time service performance for all mail and shipping products once all elements of the plan are implemented. Service performance is defined by the Postal Service as the time it takes to deliver a mailpiece or package from its acceptance into our system through its delivery, as measured against published service standards.
